Inelastic Collisions – Data Files

The data files provided for this experiment are `.cmbl` files that can be opened with Logger Pro.

The files follow the same general naming format:

$$\texttt{XXXg\_on\_YYYg\_Collisions.cmbl}$$

XXXg indicates the approximate amount of mass (in grams) that was added to the initially *moving* cart. This the cart that is referred to as m_1 in the pre-lab and assignment. Note that this is NOT the total mass of the cart.

YYYg indicates the approximate amount of mass (in grams) that was added to the initially *stationary* cart. This the cart that is referred to as m_2 in the pre-lab and assignment. Note that this is NOT the total mass of the cart.
